

To whom it may concern

I find that using the services of Matthew at Floorplans Plus keeps the properties I sell one step ahead of the rest. I place Matt's floorplans on colour brochure's which are handed out at inspections for the buyers to take home with them.

They can then look back at the floorplan and remember where every room was, how much storage there was, how big the rooms were, and all the other things big or small that we tend to forget once we have left the property.

I also place the floorplans on the internet to help people who have never even entered the property get a feel for the layout of the property. It is also sent out on ebrochures for registered buyers on realestate.com.au. Such an amazing marketing tool!

Matt provides an extremely fast, professional and accurate service. Sending the finished floorplans over email in various formats so they are ready for immediate application to your websites in any format you may require.

With Matt providing such a professional service it also helps me to do the same for my clients. I use this fantastic tool with every property I list. Wouldn't sell with out it!

Thanks Matt!
